No. 217. *The 6th September* 1875.

The Supreme Government having sanctioned the commencement of the Topographical Survey of the Mysore Province, the Officiating Chief Commissioner directs that the following instructions shall be issued for the information and guidance of all classes of the people.

2. The object of the Revenue Survey in Mysore, which has been for some years in progress, has been to survey and assess all holdings from which the State derives or may hereafter derive its land revenue. On the other hand, the Topographical Survey has no concern with the survey and assessment of fields, nor with the demarcation of village boundaries, when these boundaries have been already determined by the Revenue Survey Department. Its object is to delineate the features of the country, such as the position of villages, hills, rivers, banks and reservoirs, &c.

3. The Officiating Chief Commissioner further desires it to be distinctly understood that while the local Officers and villagers will be required to give all reasonable aid to Officers of the Topographical Survey, no gratuitous labor will be exacted, and those Officers hold themselves responsible that all aid afforded, whether in labor or materials, will be duly paid for.

4. The following are the particulars in which aid will be required.

Stations.—The "Stations" of the Topographical Survey are built on hills, ridges, tank bunds and other sites affording a commanding view. The roofs of buildings and temples will, if access to them be unobjectionable, be selected for signal stations. These "Stations" when built will be placed under the immediate charge of the Patel and other Government servants of the village in which they are respectively situated, and they will be held responsible that the marks used for fixing the "Stations" are not tampered with.

Materials, labor, carriage and supplies.—The villagers will be expected, on adequate remuneration, to supply the Officers of the Survey with such materials as they may require to build the stations, so far as they may be obtainable in villages.

The labor of coolies to supplement the Survey Establishment will at times be required in clearing sites, and in carrying instruments and signalling staves wherever this is indispensable. Supplies consisting of the ordinary necessaries of life, will be supplied to the Officers and employés of the Survey, on payment and after sufficient notice.

Information.—The Patels and other village servants are enjoined to comply promptly with all summons made to them by the Officer of the Survey, and to furnish all required information.

5. A Survey Party consisting of Captain Strahan, R. E., Deputy Superintendent, with three Assistants, will commence operations on or after the 1st October next in the Nundydroog Division, and another Party under Captain McCullagh, R. E., Assistant Superintendent, with three other Assistants, will break ground in the Nagar Division.
